EXPERIENCE

Half Odd · Founder, Designer & Software Engineer

Copenhagen · Jan 2023 - Present

- Lead 0→1 digital products and web experiences from product definition and interaction design through visual systems, engineering, testing, and launch.
- Currently designing and engineering Wrestling Octopi, a social-media workspace in active development toward beta, owning product direction, UX/UI, architecture, integrations, testing, and iteration.
- Use AI-assisted development workflows with Codex and Claude Code to accelerate exploration and implementation while retaining responsibility for product decisions, visual quality, manual testing, and debugging.
- Lead client work from brief and scoping through design, technical implementation, stakeholder feedback, QA, and launch; extend brand systems across responsive digital and physical touchpoints.

SAP Germany · Front-End Developer / Software Engineer, SAP Graph

Berlin · Aug 2020 - Aug 2021 · Internship, then Working Student

- Contributed during the early-access phase of SAP Graph, an enterprise developer platform creating a unified semantic API across otherwise fragmented business data.
- Translated high-fidelity product designs into production React and TypeScript interfaces and built 10+ reusable UI components and wrappers within SAP's Fiori/UI5 ecosystem.
- Built and maintained automated frontend testing with Jest, Cypress, and Gauge while contributing across Scrum planning, implementation, code review, documentation, and enterprise delivery.
- The capability later evolved into Graph / API Composition, now generally available within SAP Integration Suite's API Management offering.

SAP Germany · Software Engineer, Strategic Development Projects

Potsdam · Mar 2022 - Sep 2022 · Working Student

- Contributed to the architecture and development of a co-working-space booking product within SAP Technology & Innovation, working across frontend and backend with React, TypeScript, GraphQL, and Jest.

SELECTED WORK

Wrestling Octopi	Product Design · Design Engineering · Software Development	0→1 social-media workspace currently in active development toward beta launch.
Antispace Berlin	Brand Extension · UX/UI · Framer Development	Extended an existing identity across print, social, and a responsive digital experience for a Berlin longevity and community space.
Half a Love Letter	Interaction Design · Creative Technology · Development	AI-design experiment comparing emerging design tools, culminating in a hand-crafted anonymous letter experience built with HTML, CSS, JavaScript, and Firebase.

EDUCATION

Copenhagen Business School	MSc Business Administration & E-Business	2022 - 2024
Vrije Universiteit Amsterdam	BSc Computer Science	2018 - 2021
Hawai'i Pacific University	International Exchange · Graphic Design & Marketing	2021

SKILLS

Design	Product Design · Interaction Design · UX/UI · Design Systems · Visual Design · Prototyping
Engineering	React · TypeScript · JavaScript · GraphQL · HTML/CSS · Front-End Development · Automated Testing
Tools + AI	Figma · Framer · Git · Codex · Claude Code · AI-Assisted Development
